

# PREVENT FALLS WITH SAFE SHOES

Motion shoes have these features:

High collar and small throat for ankle support.

Lace or velcro fastening to hold the foot firmly.

Firm heel cup provides support when walking.

Wide and deep toe box allows plenty of room for toe movement and comfort.

Low, wide heels with rounded edge provides more contact with the ground.

Rolled off toe gives more toe clearance, preventing tripping.

The gentle curve of the Motion Sole helps reduce pressure on the foot, which makes walking easier.

**Talk to a Podiatrist or footwear specialist. Invest in your safety and comfort.**
